- **Agile Project Management**
Google through Coursera, 2021
Agile philosophy | Scrum fundamentals & implementation
- **Web Development**
ZTM, 2020
HTML | CSS | Javascript | React | Node.js
- **Conflict Resolution & Presentation Skills**
Results Training Kft, 2019

LANGUAGES

- **Portuguese** - native
- **English** - fluent
- **Spanish** - advanced

SOFT SKILLS

- **Solution-oriented**
- **Proactivity**
- **Adaptability**
- **Communication**
- **Attention to detail**

I am a Brazilian Web Developer and Electrical Engineer. I have experience with JavaScript, React, Redux, Git, CSS, Material UI, among other libraries and frameworks.

My goal is to work for an innovative company where I can develop meaningful web applications using modern tools, which is my true passion. My main strengths are discipline and ambition to learn.

EXPERIENCE

JavaScript Developer (2022)

[Blue Guava - media streaming solutions company](#)

Development of user interfaces using React, Redux, Material UI, and Figma for design. Backend collaboration and integration through REST API. Usage of AWS for communication service user interface. Bug fixing.

Web development - own projects (2021 - 2022)

Development of personal projects, such as a [portfolio](#), totally designed and developed by myself. I have built an [e-commerce](#) cosuming a REST API, with Stripe integration for online payments simulation. I also created a web-based solution with vanilla JavaScript and Jest testing framework, that [converts numbers into the English phrase of the given number](#). I have also created full-stack projects, using NodeJS and Express, among others.

Sr. Data management analyst (2021 - 2022)

[Sanofi - global healthcare company](#)

Focusing on product data, my activities included overseeing the collection, storage, management, quality, and protection of global data. My main achievements were to write the global Standard Operating Procedures for the full products lifecycle, and create the structure and design of the team's internal webpage.

Data management analyst (2018 - 2021)

[Eaton - multinational power management company](#)

Analysis of quality and availability of product data for the EMEA electrical sector. I led projects aimed at digital readiness with +300 3D product models created and published for the Dutch and German markets as a result. I was also in charge to ensure correct and up-to-date data distribution to major European customers. I have as well provided training sessions on data tools to over 300 people from different teams and countries across the region.

Improving Eaton's carbon footprint Project (2019)

[Eaton - multinational power management company](#)

Voluntary research led by me for decreasing office equipment's electricity consumption. As result, a solution with potential for saving 30% of electricity consumed by computers and photocopiers was proposed.
